

Rene Cocom

Chicago, IL 60645 | 312-890-6166 | racocom@gmail.com

FULL STACK SOFTWARE ENGINEER

Results-driven Software Engineer with expertise in full-stack development, cloud computing, and DevOps practices. Proficient in designing, developing, and deploying scalable web applications using modern frameworks. Skilled in JavaScript, TypeScript, React, Next.js, and SQL, with experience implementing CI/CD pipelines and cloud-based architectures in Azure. Adept at collaborating across teams to deliver high-quality software solutions, optimize performance, and enhance user experience. Passionate about building robust, maintainable, and efficient applications.

TECHNICAL PROFICIENCIES

Languages: JavaScript, TypeScript, Python, Java

Front-End: React, Next.js, Angular

Back-End: Node.js, Express, RESTful APIs

Databases: SQL, MySQL

Cloud & DevOps: Azure, Docker, Jenkins, CI/CD Pipelines

Testing: JUnit, Jest

Monitoring: Splunk

Version Control: Git, GitHub

CERTIFICATIONS

Flatiron School – Software Engineering Bootcamp

IBM Apprenticeship Graduate – Associate Application Developer

Azure Training Certification

SAP Training Certification

EXPERIENCE

Software Engineer – DevOps

US Cellular – Chicago, IL | Feb 2023 – Present

Tech Stack: TypeScript, Next.js, Python, Jenkins, Splunk, Vertex

- Developed and optimized full-stack web applications to improve internal workflows and system monitoring.
- Designed and maintained React-based front-end dashboards, enhancing real-time data visibility and system insights.
- Built and deployed automated CI/CD pipelines using Jenkins, reducing manual deployment time by 40%.
- Provided production support by troubleshooting application issues, ensuring system stability and compliance with SOX regulations.
- Led the implementation of monitoring tools (Splunk, Vertex) to improve performance tracking and incident response.

Software Developer

IBM – Baton Rouge, LA | Feb 2021 – Sep 2022

Tech Stack: JavaScript, TypeScript, React, Angular, Java, JUnit, Azure

- Engineered and deployed React-based e-commerce solutions, optimizing UX/UI components such as payment checkouts and site navigation.
- Managed full software development lifecycle (SDLC) from planning to deployment, utilizing Agile methodologies.
- Led data migration projects leveraging SAP Hybris Cloud, streamlining product and client management workflows.
- Developed and tested Java-based API services using JUnit, ensuring high-performance and bug-free releases.
- Designed and integrated Dockerized microservices, improving system scalability and cloud integration on Azure.

EDUCATION

Flatiron School – Software Engineering Bootcamp

- Developed and deployed full-stack web applications using JavaScript, Ruby, React, and MySQL.
- Built RESTful APIs and implemented OAuth authentication for secure user management.

Chicago State University – B.A. in Graphic Design with UI/UX Focus

- Applied UI/UX design principles in web applications, leveraging Adobe XD and Photoshop to enhance front-end design.
